3G Packaging COVID-19 Coronavirus Protocol

We at 3G Packaging Corp. are taking the COVID-19 Coronavirus very seriously and are monitoring events as they unfold. We will be adjusting our protocol as necessary as needs arise or situations change.

We have increased our housekeeping and sanitization efforts in the office and warehouse and added an additional day for extra cleaning of all touch points. We have also implemented a visitor screening process.

The health and safety of our employees and our customers is of utmost importance.

Our employees have been asked to monitor their individual health situations and if even the slightest change is noticed to please notify management immediately or self-quarantine and notify management immediately.

Our drivers have been briefed on social distancing and have been supplied with hand sanitizer to be used liberally.

Our supply line for critical packaging products such as shrink film, carton sealing tapes and pallet wrap ETC are all intact and fully functioning to date. In addition, we have increased inventories in order to ensure should there be an interruption of supply we can maintain our service levels to all of our valued customers.

Thank you all for cooperation and understanding as we all deal with this serious health situation.

If you have any questions or concerns, please do not hesitate to contact one of our management team.
